Dear Parents/Carers

Social Media use outside of school

We are writing to advise you of a few concerns that we have regarding children's use of social media outside of school during evenings and weekends that involve some children from Year 5 and Year 6. There are several groups of pupils using social media to be persistently unkind about other pupils over platforms such as Snapchat and WhatsApp. We understand that this has included both sharing unkind comments about pupils and memes of the pupils. This is leading to a lot of upset and polarisation of some pupils within school and is not in line with our school values.

Most Social media apps are for pupils 13 years and over. If you do allow your child to access social media, we ask for your vigilance. Just like their interactions in person, online interactions require supervision and support. What is right will vary from family to family but some strategies that are known to be successful include:

- Monitoring their phones for the apps that are downloaded
- Enacting parental controls on phones and consoles
- Reviewing the messages they send on platforms and apps – making monitoring part of a daily or weekly routine/ unexpected monitoring and checking
- Setting expectations about what space (preferably communal) and times they have access to devices
- Encouraging them to share or discuss with you what they are doing.

Whilst we appreciate the benefits (and prevalence) of these forms of communication, many of our pupils are struggling when any problems or conflict arise as a result of what is being shared. We are asking for your partnership in dealing with this, as this is happening outside of school.

As a school we are responding to this with additional teaching during Computing, PSHE and Wellbeing lessons and in 1:1 conversation and teaching opportunities as they arise. I have encouraged children to share any inappropriate messages with their adults so as parents you can see who they are communicating with. Please also find attached a helpful guide on settings for various apps. Thank you for your co-operation.

Kind regards,

Mrs Callaghan

What Parents & Carers Need to Know about **WHATSAPP**

AGE RESTRICTION
13+

With more than two billion active users exchanging texts, photos, videos and documents, as well as making voice and video calls, WhatsApp is the world's most popular messaging service. Its end-to-end encryption only allows messages to be viewed by the sender and any recipients: not even WhatsApp itself can read them. This privacy issue has been in the spotlight recently, as the UK's Online Safety Bill proposes to end such encryption on private messaging; WhatsApp is unwilling to do so and has reportedly considered withdrawing its service in the UK should this legislation go ahead.

...MSG ME...

WHAT ARE THE RISKS?

EVOLVING SCAMS

WhatsApp's popularity makes it a lucrative hunting ground for scammers. Recent examples include posing as the target's child, requesting a money transfer because of a spurious 'emergency'. Plus a scam where fraudsters trigger a verification message by attempting to log in to your account, then (posing as WhatsApp) call or text to ask you to repeat the code back to them, giving them access.

CONTACT FROM STRANGERS

To start a chat, someone only needs the mobile number of the WhatsApp user that they want to message. If your child has ever given their number out to someone they don't know, that person could then contact them via WhatsApp. It's also possible that your child might be added to a group chat (by one of their friends, for example) containing other people that they don't know.

FAKE NEWS

WhatsApp's connectivity and ease of use allows news to be shared rapidly – whether it's true or not. To combat the spread of misinformation, messages forwarded more than five times on the app now display a "Forwarded many times" label and a double arrow icon. This makes users aware that the message they've just received is far from an original... and might not be entirely factual, either.

ONLINE

'VIEW ONCE' CONTENT

The facility to send images or messages that can only be viewed once has led to some WhatsApp users sharing inappropriate images or abusive texts, knowing that the recipient can't re-open them later to use as evidence of misconduct. People used to be able to screenshot this 'disappearing' content – but a recently added WhatsApp feature now blocks this, citing increased privacy.

CHAT LOCK

Another new option allows users to store certain messages or chats in a separate 'locked chats' folder, saved behind a passcode, fingerprint or face ID authentication. The risk here is that this function creates the potential for young people to hide conversations and content that they suspect their parents wouldn't approve of (such as age-inappropriate material).

VISIBLE LOCATION

WhatsApp's 'live location' feature lets users share their current whereabouts, which can be helpful for friends meeting up or parents checking that their child's safely on the way home, for example. However, anyone in your child's contacts list or in a mutual group chat can also track their location – potentially letting strangers identify a child's home address or journeys that they make regularly.

Advice for Parents & Carers ...TYPING...

EMPHASISE CAUTION

Encourage your child to treat unexpected messages with caution: get them to consider, for example, whether the message sounds like something a friend or relative would really send them. Make sure they know *never* to share personal details over WhatsApp, and to be wary of clicking on any links in messages. Setting up two-step verification adds a further layer of protection to their WhatsApp account.

ADJUST THE SETTINGS

It's wise to change your child's WhatsApp settings (go to 'Privacy', then 'Groups') to specify which of their contacts can add them to group chats without needing approval; you can give permission to 'My Contacts' or 'My Contacts Except ...'. Additionally, if your child needs to use 'live location', emphasise that they should enable this function for only as long as they need – and then turn it off.

THINKING BEFORE SHARING

Help your child to understand why it's important to stop and think before posting or forwarding something on WhatsApp. It's easy – and all too common – for content to then be shared more widely (even publicly on social media). Encourage your child to consider how an ill-judged message might damage their reputation or upset a friend who sent something to them in confidence.

CHAT ABOUT PRIVACY

Some parents like to check in with their child about how they're using WhatsApp, explaining that it will help to keep them safe. If you spot a 'Locked Chats' folder, you might want to talk about the sort of chats that are in there, who they're with and why your child wants to keep them hidden. Also, if your child has sent any 'view once' content, you could discuss their reasons for using this feature.

Meet Our Expert

Dr Claire Sutherland is an online safety consultant, educator and researcher who has developed and implemented anti-bullying and cyber safety policies for schools. She has written various academic papers and carried out research for the Australian government comparing internet use and sexting behaviour of young people in the UK, USA and Australia.
