29th November 2023

Dear Parents/Carers,

I am writing to you with concerns regarding the PlayStation/Xbox/Computer game "Fortnite". If your child does not play this game, please ignore this letter.

Fortnite is a free online survival game with up to four players working together on missions to collect resources, build forts and construct weapons/traps to engage with an army of zombie-like creatures that are trying to kill them. Our main concern with this game is that it is free, meaning it is much more accessible compared to other games with inappropriate themes for children. As previously mentioned, the use of weapons and the violent themes are an issue and are increasingly becoming a concern.

Fortnite has a PEGI rating of 12, meaning that if a child is below this age, they should not be playing this game. From Year 3 to Year 6, we are aware of many children playing Fortnite on a regular basis. You will of course make your own decision on as to whether you allow your child to play this game, however if you decide to ignore the 12+ age rating, can we urge you to sit with your child and discuss the themes of the game with them. It may be useful to see how your child is playing the game – especially when playing this game online against other users, as well as how other users are behaving towards your child. Online interaction with peers should be monitored.

Some children in school have reported playing Fortnite for 2-3 hours each night. The Child Mind Institute for healthy minds advises that children's game time should be under 30-60 minutes on a school day and no more than 2 hours on non-school days. Prolonged game time can cause poor social skills, restlessness, irritability, headaches, withdrawal and can cause children to display negative thoughts and behaviours. Regardless of what limits you think are appropriate, they advise that some days each week should involve no gaming. It is crucial to ensure that your child develops, maintains, and enjoys other, non-screen time activities.

Currently, staff at our school are spending a considerable amount of time dealing with emotional issues that come from playing online with friends. Adding to this, time has been spent with some individuals that have been using inappropriate language and signs that come from Fortnite and this in turn will lead to in school behavioural consequences. If you wish to discuss this game or any problems regarding Fortnite or support with online gaming, please come and speak to me so that we can work together to help your child.

Thank you in advance for your cooperation and support with this current issue.

I enclose an information leaflet from National Online Safety about Fortnite for your information.

Mrs Callaghan
Head of School

At National Online Safety we believe in empowering parents, carers and trusted adults with the information they need to hold an informed conversation about online safety with their children, should they feel it is needed. This guide focuses on one platform of many which we believe trusted adults should be aware of. Please visit www.nationalonlinesafety.com for further guides, hints and tips for adults.

There's a very good chance you've heard of Fortnite, but what exactly is it? And why is it so popular amongst young people? Fortnite is an online multiplayer "battle royale" game developed by Epic Games, and is playable on Playstation 4, Xbox One, Nintendo Switch, PC and mobiles. It gained popularity in late 2017 and has since become the biggest game in the world, thanks to its rapid and engaging gameplay. As with most games, Fortnite itself is a highly enjoyable and safe experience, but it pays to be vigilant, as the safety is not water tight.

BATTLE ROYALE

Battle Royale games have become very popular over the last couple of years, and most tend to follow a very similar setup. Taking Fortnite as an example, 100 players drop into a map, loot buildings for weapons and armour and attempt to beat all the other players to be crowned victor at the end. If you've ever seen the Hunger Games movies, you'll have an idea of what this entails. Each game can take up to 20 minutes (assuming you last to the end) and can be restarted relatively quickly once 100 free players have been found.

IS FORTNITE ADDICTIVE?

Fortnite is at the forefront of gaming addiction discussions because it is so popular with young people. But whether it actually contributes to gaming addiction is up for debate. WHO (World Health Organisation) have classified gaming as a legitimate addiction, but this is not solely a concern with Fortnite. Signs of addiction can include irritability when not playing, lying about the amount of time played and a preoccupation with thoughts of the next gaming session. Realistically, it must be down to parents and carers to recognise these symptoms and act accordingly if they think they are developing.

FREE TO PLAY... OR IS IT?

While Fortnite is technically free to play (in that you can download and play it without paying) it does come with the caveat that spending money on things like skins and emotes in-game is heavily pushed to players. The currency used in-game is called 'V-Bucks' and can be bought with real money through the game's online store. It's worth remembering that these purchases are absolutely not necessary, are cosmetic only and that V-Bucks can be earned in-game with enough play time.

SEASONAL UPDATES

Every 10 weeks or so Fortnite is updated with a new season. This essentially adds new things like skins and emotes to the game, while also sometimes changing up the game map in interesting ways. These seasons are free to everybody and don't require additional money to play, though battle passes for each season can be bought with V-Bucks. A battle pass will typically allow a player to earn experience faster and gain fun in-game items by completing a host of daily challenges.

CROSSPLAY IS AVAILABLE

One of the wonderful things about Fortnite is that it can be played cross-platform. This means that no matter what platform a person plays on (PC, PlayStation 4, Xbox One etc) they can play with friends who own the game on a different platform. To do this, an Epic Games account must first be created online (which is free) and then linked with your platform account. Doing this removes the age-old boundary of not being able to play together because you don't have the same console and opens up a whole new world of playing online with friends.

IS FORTNITE VIOLENT?

Fortnite has been rated by the ESRB (Entertainment Software Ratings Board) as teen, as it contains cartoony violence and the weapons and acts depicted in the game are some way removed from their real life inspirations. Characters don't draw blood when shot and instead of dying, they are simply beamed up off the map. Naturally, players younger than the recommended age limit will want to play the game and that should be at the discretion of parents and carers.

Top Tips For Parents

BUYING V-BUCKS

As mentioned, Fortnite does contain in-game purchases and microtransactions in the form of V-Bucks which can be bought with real money. If you do decide to let your young one spend money in the game, be sure to delete your card information afterwards as it can be very easy to purchase more items at the press of a few buttons. It's important to set a limit on any purchases (as mentioned they are absolutely not necessary to play the game) and a suggestion would be capping the spending at around £50 - this is the normal retail price of a game.

GAMING WITH STRANGERS

Fortnite Battle Royale is an online game, and as such, there is a chance that young children could come into contact with strangers who are randomly placed into their groups in a game. It's difficult to predict what another person might say or do in a game, so it's a good idea for friends playing together, to be grouped together. The only real countermeasure to interacting with strangers offered by Fortnite is to turn off all mic communications, which can be done in the game's settings. Using outside chat apps, like Skype or Discord while playing, is a great way to make sure you know who you're talking to and that nobody else is listening in.

LIMIT TIME, BUT BE FLEXIBLE

A game of Fortnite can last up to 20 minutes, so be flexible when it's time to put it away. The approach of 'one more game' as opposed to '10 more minutes' will stop any complaints that a match is still ongoing. Better still, play with your child and take it in turns; that way you're helping control the time played and can keep an eye on what they're experiencing.

TALK TO OTHER PARENTS / CARERS

If you're concerned about play time or spending money in the game, talk to other parents and carers of your child's friends. If you approach as a collective, it will be easier to know when their friends are online and you don't have to worry about who they're playing with. It can also help curb expectations on spending money on battle passes and skins if you stick together.

CAN DEVELOP SOME IMPORTANT SKILLS

It's often overlooked just how good gaming can be for young people. Fortnite encourages team play, quick and complex problem solving and communication; that's not to mention the lightning fast reflexes gamers can develop. While taking breaks to do other activities is of course important, there are benefits to screen time which might not be immediately obvious.

PLAY THE GAME YOURSELF

There's no substitute for sitting down and playing the game yourself to learn all about it. Fortnite is available for free on almost anything you can imagine, even your smartphone, so there's never been a better time to get involved and see what all the fuss is about. You never know, you might even be able to impress your children when you show them your impressive Victory Royale tally!

Meet our expert

Mark Foster has worked in the gaming industry for 5 years as a writer, editor and presenter. He is the current gaming editor of two of the biggest gaming news sites in the world, UNILAD Gaming and GAMINGBible. Starting gaming from a young age with his siblings, he has a passion for understanding how games and tech work, but more importantly, how to make them safe and fun.
